

September 2020

Dear Families,

Home Learning Provision and Expectations

We are very pleased to have reopened the academy to all year groups this week. However given the unexpected nature of Covid 19 we do not know when, or if, there is the potential for any further local lockdowns. If there are any such further closures we need to be prepared. The academy has put procedures in place to support learning for your child at home if these circumstances arise. On a weekly basis, you will receive information of the work that your child will be required to complete at home if they are self-isolating or if school is closed. We will notify parents and students via school ping and it will also be available to view on the academy website. Your child will receive this work via their school email address every Monday morning. This will start from Monday 7 September 2020.

If your child has to self-isolate then they should complete all the work set in the table below for their year group. Students access the work by clicking on the subject and then they will be required to login using their school email address and password. All students have been provided with these details.

Before your child completes their work at home, they should read the document labelled 'student instructions' carefully. Videos will be used where possible to support with teacher explanations. We advise that you should also look at the work set so you can support the academy in monitoring your child's work. Your child should complete maths, English and science work daily and all other subjects according to the home learning timetable for their year group (please see the back of this document).

All completed work for that week should be emailed direct to their subject teacher by Friday 3.30pm at the latest so teachers can monitor and track student progress. **Please note for Year 11 there will be no work set until week commencing the 14 September due to exams taking place.**

It is very important that your child completes their home learning work each week as the content covered will not be repeated once they return to the academy. If your child fails to complete their home learning, this will be followed up by an appropriate sanction. We will also put support in place for students who have identified that they have no access to the online resources. We would really appreciate your parental support with home learning and if you have any further questions please email: info@dixonska.com

Yours sincerely

Mr R Wilson
Principal
